

**Assistant Professor of Computer Engineering
United States Naval Academy
Annapolis Maryland**

The Naval Academy's Electrical and Computer Engineering Department invites applications for multiple tenure-track civilian faculty positions in computer engineering. Applicants with teaching and research interests in all areas of computer engineering will be considered, including but not limited to cyber security, operating systems, computer networking, parallel computing, distributed systems, storage systems, embedded systems and compilers. All applicants must have a dedication to teaching undergraduates, and have an ability to teach a broad range of computer and electrical engineering courses. The ideal candidate will also have an ability to initiate and maintain a strong research program, including a record of peer-reviewed journals and conference papers.

The [United States Naval Academy](https://www.usna.edu) is a unique institution of higher learning located in desirable [Annapolis, Maryland](https://www.usna.edu). As an historic officer accession program and premier undergraduate college, the United States Naval Academy has its own unique niche amongst American educational institutions. Our talented faculty and staff are united by one common purpose--to develop the next generation of leaders for naval service. In order to deliver on this promise to our nation, we recruit from all segments of society to find faculty, instructors, and support staff who model the highest professional standards.

Every year more than one million people tour "the Yard" to experience what our employees already know — the United States Naval Academy is a special place, with a special purpose. Those selected for employment will find challenging and rewarding work; state-of-the-art facilities which inspire academic and athletic excellence; the benefits of Federal employment; and exceptional quality-of-life.
