

University of New Haven

DEPARTMENT OF ELECTRICAL AND COMP.
ENGINEERING & COMP. SCIENCE

TAGLIATELA COLLEGE OF ENGINEERING

The Department of Electrical & Computer Engineering and Computer Science (ECECS) in the Tagliatela College of Engineering at the University of New Haven announces two tenure-track faculty positions to start is August 20, 2018. One position is in the Electrical Engineering with expertise in the application of data science techniques to communication, autonomous systems, or robotics. Backgrounds in cyber-physical systems, signal processing, IoT, and related application areas are desired.

The other position is in the Computer Science with research areas in data science. Preference will be given to candidates with additional research interests in cybersecurity, network analysis, artificial intelligence, or a core area of computer science.

The college is fully committed to assembling faculty from diverse backgrounds and ethnicities to enrich our students' experience and growth. Women and members of historically underrepresented groups are encouraged to apply.
